CERTIFICATE OF COMPLIANCE & TESTING

WALL TYPE PRESSURE RELIEF VALVE

F1494T wall type hydrostatic pressure relief valve is suitable for side wall installation in tanks and digesters.

The valve is of the 10 degree offset seat design with offset sing pivoted hinge.

The flap gate and body are of cast iron confirming to ASTM specifications A-126 Class B.

The body seat ring and hinge pin shall be furnished to bronze.

The gate has a neoprene rubber seat cemented and mechanically retained in place by a retainer plate.

The body seat ring is threaded and screwed into place and the face machined to a smooth finish.

The valve has a 4" or 6" flanged end faced and drilled to ANSI 125 pound template for connection to a 4" or 6" wall pipe.
